

MACHINERY
KINGSWEL

历史 发展 Corporate History

上海环球机械有限公司是台湾中桦机械股份有限公司在上海投资的一家集科研、开发、生产、咨询、规划、销售、服务与进出口贸易于一体的塑料加工辅助设备总汇的企业。自1993年成立以来，凭借海外近三十年的专业技术优势，突破传统的生产窠臼，展现先进的技质精华，通过ISO9001质量体系认证，CE认证，取得“企业安全生标准化”，荣获“优秀台资企业”，“劳动关系和谐创建企业”，提供一流的王牌辅机，并在全国设有九家销售服务中心。诚心帮您解决问题，诚意为您创造财富，让您的塑机活起来，便您的利润涨起来。

Shanghai Huanqiu Machinery Co., Ltd., fully-funded by Taiwan John-Huah Plastic Machinery Plant, affiliated with Shanghai Kingswel Industries Group, since established in 1993, has been and will be the forerunner among plastic auxiliary machines manufacturers. Based on over 30 years' expertise and technical buildup overseas, we have broken and will continue to break the traditional mode of manufacture, and have demonstrated and will continue to demonstrate state-of-the-art technologies. The CE Mark Certificate, ISO 9001:2000 Certification, excellent quality and reasonable prices, which mostly benefit from us successfully employing the ERP SYSTEM, give us much more edges in Plastic Machinery Circle home and abroad.

特点 Features 热风干燥机 Hopper dryer

- ☑ 具有自动保护电热管功能
Electrical heating tube with automatic protection function;
- ☑ 采用知名品牌的电器元件，性能可靠
Provided with well-known brand of electrical components with reliable performance;
- ☑ 加热管采用SUS304不锈钢材质，无污染，使用寿命长
Heating tube made of SUS304 stainless steel featuring non-pollution and prolonged life cycle;
- ☑ 筒体部分密封件用硅胶材质
Cylinder seals made of silicone material;

特点
Features
加料机
Auto loader

- 机体与储料桶采用分离式设计，便于安装**
The separation-type design is adopted for machine to be convenient for installation. The machine body is placed on the ground to be convenient for operation, filter washing or curing.
- 电机采用三相高静压感应式，输送能力大，使用寿命更长，免除更换碳刷之问题**
The electromotor is adopted with three-phase high hydrostatic induction type, with greater conveying capability and longer service life, the worry on carbon brush replacement is exempted.
- 加料筒采用不锈钢材质，确保原料不受污染，并增长使用寿命**
The storage bucket is adopted with stainless steel material so as to ensure that the raw materials are not polluted, and the service life is prolonged.
- 微电脑全功能操控器采用台湾原装进口产品，确保性能更稳定，使用寿命更长**
The original products imported from Taiwan are adopted for micro-computer full functional controller so as to ensure that the performance is more stable and the service life is longer.
- 带有可调自动反吹除尘装置，确保滤清器不堵塞，延长清除周期**
The adjustable automatic back-flushing dedusting device is attached so as to ensure that the filter isn't plugged to prolong the clearing period.
- 带有满料指示，缺料警报电机过载保护装置等，方便操控与故障排除**
The full feed indication and the electromotor overloading protection device on feed lacking alarm are attached to be convenient for operation control and troubleshooting.
- 粉末加料机滤清器采用特殊材质制成，保证不破裂，可清洗重复使用**
Washable filter made from special material for repeatable usage.

JL2系列加料机技术参数

JL2 auto loader technical parameters

| 型号 Model | JL220 | JL230 | JL245 | JL260 | JL280 | JL2100 | JL2150 | JL2200 |
|---|--|-------|-------|-------|-------|--------|--------|--------|
| 输送量 (kg/h) Inner conveying | 200 | 300 | 450 | 600 | 800 | 1000 | 1500 | 2000 |
| 气泵功率 (kw) Gas pump power | 0.75 | 1.1 | 1.5 | 2.2 | 3.0 | 4.0 | 5.5 | 7.5 |
| 吸气管内径 (mm) Inner diameter of air suction pipe | Φ38 | Φ38 | Φ50 | Φ50 | Φ63 | Φ63 | Φ63 | Φ76 |
| 吸料管内径 (mm) Inner diameter of feed suction pipe | Φ38 | Φ38 | Φ38 | Φ50 | Φ50 | Φ50 | Φ63 | Φ63 |
| 加料筒容积 (L) Volume of charging bucket | 8 | 10 | 12 | 15 | 20 | 40 | 40 | 40 |
| 加料筒总高 (mm) Total height of charging barrel | 400 | 450 | 480 | 520 | 550 | 650 | 650 | 650 |
| 加料主机长 (mm) Length of charging main machine | 430 | 430 | 430 | 430 | 430 | 600 | 600 | 600 |
| 加料主机宽 (mm) Width of charging main machine | 500 | 500 | 500 | 500 | 500 | 800 | 800 | 800 |
| 加料主机高 (mm) Height of charging main machine | 1100 | 1100 | 1100 | 1100 | 1100 | 1150 | 1150 | 1150 |
| 安全保护 Safety protection | 1. 附有满料指示，缺料报警，电机过载保护装置等，方便操作与故障排除。 The full feed indication, alarm on feed lacking and electromotor overloading protection device are provided to be convenient for operation and troubleshooting. 2. 采用台湾原装进口微电脑全功能操控器，以确保性能更稳定，使用寿命更长。 The original micro-computer full functional controller imported from Taiwan is adopted so as to ensure that the performance is more stable and the service life is longer. | | | | | | | |
| 选购说明 Instructions on Model Selection | 1. 对输送的原料温度达80℃以上时，须配耐高温的PVC钢丝软管。 High-temperature flexible pipe must be provided when the temperature of the raw materials conveyed reaches over 80℃. 2. 输送的原料中破碎回用料较多时，须选配加料集尘器。 The dust collector for charging must be selected and matched when there are more crushed recycling materials in the conveyed raw materials. 3. 输送量以PE新粒料在高3.5米 长2.5米测量。 The conveying capacity is measured by PE new aggregate on 3.5m height and 2.5m length. | | | | | | | |

特点 **模温机**
Mold temperature controller

- ☑ 具有检测模具流量堵塞功能
Check the function of the mold flow blocking.
- ☑ 完善的安全保护系统，多项自动防错操控程序，确保设备安全可靠
Perfect security protection system and a number of automatic mistake proofing control programs ensure the safety and reliability of equipment.
- ☑ 分离式电气箱隔热设计，保障电气安全、电气寿命更长久
Separate electric box thermal insulation design ensures electrical safety, making electrical life longer.
- ☑ 电热控制采用固态继电器 (SSR) -- 选配
Adopting solid state relay (SSR) for electro-thermal control - optional.
- ☑ 内部旁通调节，可以调不整热媒油压力
Internal bypass regulating can adjust the outlet pressure of the heat transfer oil.
- ☑ 具有联机功能 (RS485)，通讯协定采用MODBUS,容易与各种人机界面、PLC、工业电脑、笔记型电脑连接。
It has an online function(RS485),and communication protocol adopts MODBUS,easy to connect with various human computers and notebook computers.

特点 温控机 Features Temperature controlling machine

- ☑ TC系列冷热两用温度控制机，集加热、制冷于一体
TC series dual-purpose temperature control machines, integrated with the heating and cooling functions in one unit,
- ☑ 能够同时输出两组不同温度的传热媒体
Able to deliver two thermal media with different temperatures.
- ☑ 温度控制范围大：每组输出都可以在5°C-95°C之间任一设定
Larger temperature control range: Able to define the temperature within 5-95 °C for each set of output.
- ☑ 采用PID智能温度控制，控制温度精度高，在1°C范围内
PID-based intelligent temperature control for regulating the temperature with a high accuracy of 1 °C.
- ☑ 选料上乘：所有机电材料均采用欧美品牌，可靠性高、寿命长
High-quality materials: All mechanical and electrical materials are imported from USA and Europe to ensure high reliability and long lifecycle.
- ☑ 具有多达11项异常保护警示功能
Featuring 11 error protection warning functions.

特点 **冷水机**
Features Industrial chiller

- ☑ 压缩机及制冷配件采用美国、法国、欧美品牌，质量可靠
Reliable and high-quality compressor and refrigeration accessories imported from USA and Europe;
- ☑ 冷凝器，蒸发器加大换热面积，能效比高，效果佳
Condenser and evaporator designed with a larger heat exchange area to ensure higher energy efficiency and better performance;
- ☑ 完善的安全保护系统，确保各设备安全可靠
Perfect security protection system, safety and reliability of equipment guarantee;
- ☑ 二十年的设计、制造经验，及先进工艺水平确保质量，领先同业
An industry leader with twenty-year experience in design and manufacturing. Adopting cutting-edge technologies to ensure high quality;
- ☑ 具有联机功能（RS485），通讯协定采用MODBUS,容易与各种人机界面、PLC、工业电脑、笔记型电脑连接。
It has an online function(RS485),and communication protocol adopts MODBUS,easy to connect with various human computers and notebook computers.

特点
Features
机器人专用冷水机
Chiller for robots

- ✓ 采用板式换热器
Using plate heat exchanger;
- ✓ 采用不锈钢材质，确保无生锈或腐蚀产生。
Using stainless steel to prevent rust or corrosion completely;
- ✓ 配置台湾原装进口触摸屏电脑控制板
Computer-based touch screen control panel imported from Taiwan;
- ✓ 采用不锈钢多级离心式特
Using special-purpose multi-stage centrifugal circulating pump, made of stainless steel, with high lift and large flow rate, ideal for robot application;
- ✓ 具有联机功能 (RS485)，通讯协定采用MODBUS,容易与各种人机界面、PLC、工业电脑、笔记型电脑连接。
It has an online function(RS485),and communication protocol adopts MODBUS,easy to connect with various human computers and notebook computers.

特点
Features
变频式冷水机
Inverter chiller

- 低噪音** (Low noise)
 噪音可低至定频压缩机的30%
 The noise of the inverter compressor can be as low as 30%;
- 环保** (Environmental protection)
 采用R410A制冷剂, 环保无污染
 Using R410A refrigerant, environmental protection and no pollution;
- 系统优化** (System optimization)
 水箱增大50%, 可选用内外循环双泵系统
 The water tank is increased by 150%, Inner and outer circulation double pump system can be used;
- 精确控温** (Precise temperature control)
- 节能减排** (Energy saving and emission reduction)
 水箱增大50%, 可选用内外循环双泵系统
 Eliminate the frequent start of the invariable frequency compressor and reduce the energy loss during operation;
- 具有联机功能 (RS485)**, 通讯协定采用MODBUS, 容易与各种人机界面、PLC、工业电脑、笔记型电脑连接。
 It has an online function(RS485), and communication protocol adopts MODBUS, easy to connect with various human computers and notebook computers.

变频冷水机参数表
Parameters of cooling-water machine

| 机型 Model | | LS315FBP | LS320FBP | LS330FBP | LS340FBP |
|------------------------------|--|---|---|-------------|-------------|
| 控制系统 Control system | 温控范围 (°C) Temperature control range | 5~35 | | | |
| | 操作程序 Operating procedures | 微电脑双组输出, 全功能防错操作系统 Microprocessor operation system | | | |
| | 温控器 Thermostat | 使用台湾进口多功能多测点LCD液晶显示之冷水机专用控制器 Multi-function multi-check-point lcd display | | | |
| | 温控程序 Temperature control program | 可测出并显示和控制冰水入口温度出口温度设定温度 Check, display and control inlet, outlet and setting temperature. | | | |
| 冷冻系统 Refrigerating System | 制冷量 (kcal/h) Cooling capacity | 49880 | 62700 | 77830 | 102000 |
| | 压缩机 Compressor | 采用丹麦DANFOSS压缩机变频压缩机+美国copeland冷冻涡旋定频压缩机 Using DANFOSS compressor inverter compressor in Denmark | | | |
| | 压缩机功率 (kW) INPUT POWER (HP) | 17.67 | 13.25+9.16 | 17.67+10.19 | 25.26+11.3 |

 The above data are subject to change without prior notice

特点 **螺旋式拌料机**
Features **Spiral blender**

- ☑ 本机一次拌料量大节省能源60%以上
Large capacity, more than 60% energy-efficient
- ☑ 全不锈钢桶体，光洁平整，无死角
Stainless-steel barrel is smooth and has no dead end.
- ☑ 投料，清料维护极为方便
Easy to load, unload, clean up and maintain the machine.

特点 **直立式拌料机**
Features **Vertical Blender**

- ☑ 摆线针轮减速机传动，运转平稳，噪音低
Driven by cycloid pin gear reducer, working smoothly and making low noise.
- ☑ 精心设计的搅拌机，能有效的翻动，扩散，对流，混料均匀，效率高
Elaborate agitator paddle for efficiently threshing, diffusion and convection, equally mixing.
- ☑ 梯形大面积触地机座，重心低，运转平稳
Trapezoidal touchdown base for low barycenter and working smoothly.
- ☑ 不锈钢拌料桶，搅料叶，光泽平整
Stainless steel barrel and agitator paddle, smooth and good appearance.

特点 PS系列破碎机
Features Ps crusher series

- ☑ 粉碎机箱体采用一体浇注成型，耐磨性好
Pulverizer box body adopts one casting molding with good wear-resistance.
- ☑ 主轴粗，加工精度高，运转平稳，寿命长
Mainshaft is coarse with high accurate processing, stable operation and long service life.
- ☑ 刀具，采用合金工具钢，刀刃锋利，持久耐用
Cutting tool adopts alloy tool steel with sharp blade and durable service.
- ☑ 刀盘设计合理，片型V型剪切设计，剪切效率高，速度快，成型颗粒形状均匀，粉末少
The design of cutterhead is reasonable; slice type and v type cutting design has high efficiency of cutting with fast speed, Ps crusher series uniform shape of molding particle and little powder.
- ☑ 复合型刀盘设计是集片型和爪型设计于一体，阶梯状排列分布，工作时分散物料冲击力，减轻碎料时的冲击力，使得每把刀片的破碎剪切力更大，效率更高
Compound type cutterhead design combines slice type and claw type to one with stair-step arrangement and distribution, in order to disperse the impact force of material, reduce the impact force during material crushing, make the broken cutting force of each pair of blade to be bigger and more efficient.
- ☑ 机器两边飞轮和带轮超大质理，增强机器的惯性，从而达到工作时降低机器能耗
The flywheel and belt wheel at two sides of machine with super large mass can strengthen the inertance of machine, so as to reduce energy consumption of machine when operating.

特点 **PT系列破碎机**
Pt crusher series

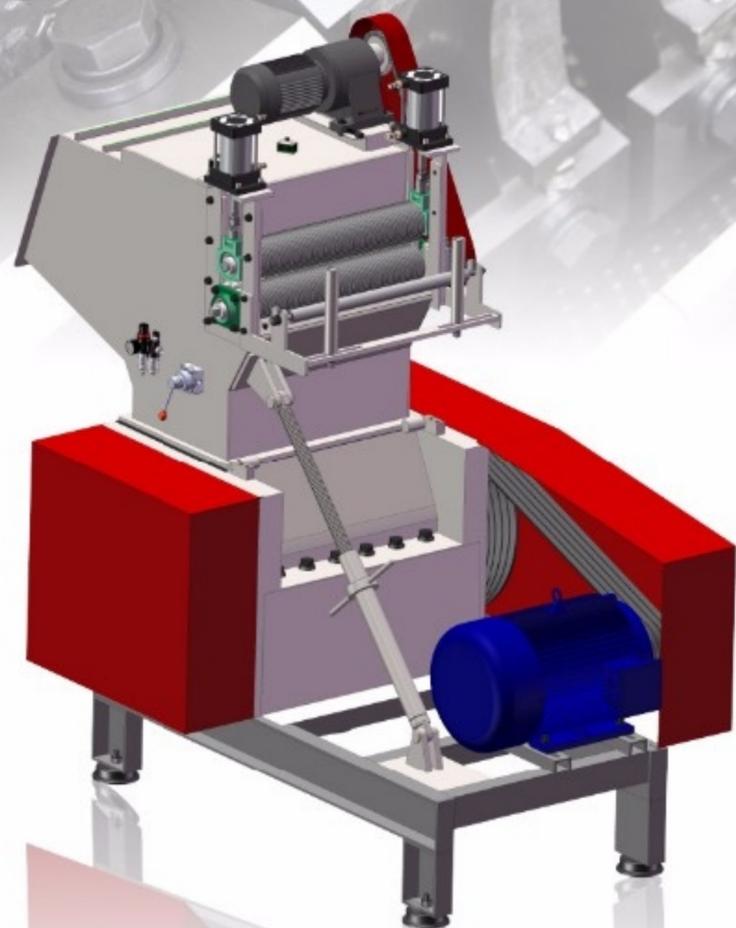

- ☑ 粉碎机箱体加厚钢板焊接箱体，外观设计大气，实用
The pulverizer box body is welded by thicken steel sheet with elegant appearance design and practical service.
- ☑ 主轴加粗，加工精度高，动平衡处理，运转平稳，震动小，使用寿命长
Overstriking main shaft has high working accuracy, dynamic balance treatment, stable operation, little vibration and long service period properties.
- ☑ 刀具，采用SKD-11材质，韧性好，刀刃锋利，持久耐用
Cutter tool adopts SKD-11 texture with good toughness, blade is sharp and durable in use.
- ☑ 主轴采用V型剪切设计，剪切效率高，速度快，颗粒形状均匀，粉末少
Main shaft adopts V type cutting design with high efficiency of cutting, fast speed, uniform shape of particle and loss powder.
- ☑ 机器箱体采用上下箱体分体设计，方便机器刀片的拆装，维护和清理
Machine box body adopts separate design for upper and lower box body, in order to facilitate the dismounting, maintenance and cleaning of machine's blade.
- ☑ 机器箱体打开采用手动摇杆打开和液压自动打开装置两种形式，从而降低劳动强度
Manual rocker and hydraulic automatic opening forms are adopted for opening machine box body, so as to reduce labor intensity.
- ☑ 独立控制系统，安全保护功能齐全
Separate controlling system has the complete safety protection function.

特点
Features
薄膜破碎机
Film crusher

- ☑ 薄膜破碎机型号齐全，不同型号满足不同客户的要求
In case of film crusher with complete model, various models can meet the requirements of different clients.
- ☑ 破碎机有三种投料口，自动牵引进料口，人工投料口，边料进料口
There are three kinds of feeder nose, automatic traction feeding hole, manual feeder nose and boundary material feeding hole.
- ☑ 进料速度控制，采用变频和机械两种进料控制方式
In case of feeding rate control, two kinds of feeding controlling modes of frequency conversion and machinery are adopted.
- ☑ 在线破碎回收节省能源，人工，降低成本
Online broken recycling can save energy, labor and reduce cost.
- ☑ 箱体采用水冷却装置，跟机器提供持续工作时间
Box body adopts water-cooling device and continuous working time provided by machine.
- ☑ 主轴根据客户材质提供专业的主轴结构满足客户要求
The main shaft is furnished according to client's texture, professional main shaft meets client requirement.

特点 除湿干燥机 Dehumidification dryer

- ✓ 零点温度可达-40度，确保塑料彻底干燥
Able to dry plastic completely with dew point temperature up to -40°C;
- ✓ 采用台湾原装进口微电脑板（LED显示屏），性能更稳定，数显强光显示，
Configured with Taiwan-made microcomputer board (LED display) to ensure more stable performance. Digital display with bright light,
- ✓ 夜晚操作更为清晰
improving the visibility for night operation;
- ✓ 采用日本进口的凤巢转轮，除湿能力强，寿命长
Featuring Japan-made honeycomb runner for better dehumidification capacity and longer life cycle;
- ✓ 具有完善的安全保护及异常指示系统
Completed with sophisticated safety protection and error indication system;
- ✓ 超大机型，可配合中央供料系统用
Large-size models, able to be integrated with central feeding system;
- ✓ 有效增加透明制品（如PMMA、PC等）的透光率
Effectively increasing the light transmittance of transparent products (e.g., PMMA, PC.);
- ✓ 增加制品的抗拉强度与耐冲击强度
Improving the tensile strength and impact strength of products;
- ✓ 确保塑料含水量降至0.02%（200ppm）以下
Reduce the tensile strength and impact strength of products;
- ✓ 缩短干燥时间，达到生产需求
Shorten the drying time to meet production needs;

The above data are subject to change without prior notice

| 露点(°C)Dew Point | 相对湿度(%)Relative humidity | 含水率(%)Water content |
|-----------------|--------------------------|---------------------|
| 20 | 100 | 2.307 |
| 10 | 52.40 | 1.212 |
| 0 | 26.20 | 0.603 |
| -10 | 11.20 | 0.257 |
| -20 | 4.40 | 0.103 |
| -30 | 1.60 | 0.038 |
| -40 | 0.60 | 0.013 |
| -50 | 0.20 | 0.004 |

*注Note:

- 露点定义:空气湿度达到饱和时的温度
Definition of dew point:the temperature when air humidity reaches the saturation rate.
- 露点说明:露点越低表示该露点下空气越干燥
The lower the dew point is, the drier the air is at this dew point.

Features 特点

SHY系列除湿干燥供料机

SHY integrated dehumidification drying and feeding machine

- ☑ 适用本机的设备，可全自动操作
Run automatically.
- ☑ 可在产品生产时不会受气候变化等外界潮湿空气的环境影响
Work without any influence by ambient moisture.
- ☑ 可提高产品的抗拉强度，冲击强度，电器性能等内在质量
Improve the inherent quality of product, such as tensile strength, shock resistance, electrical functions, etc.
- ☑ 可解决产品生产时出现的气泡，银纹，变形等外观质量问题
Solve the problems of bubbles, silver stripes, deformation on the finished products.
- ☑ 露点温度-40°C以下
Minimum dew-point temperature:40°C.
- ☑ 可二次送料
Able to convey material a second time.

简介 Introduction 集中供料系统 Centralized material handling system

集中供料系统是根据气力输送的原理，采用工业程控器的集中控制系统来将塑料原料按信号的先后顺序依次不断地在原料区分别自动输送至各个区域的生产主机内，可连续（24小时/天）实现供料自动化、作业无人化。

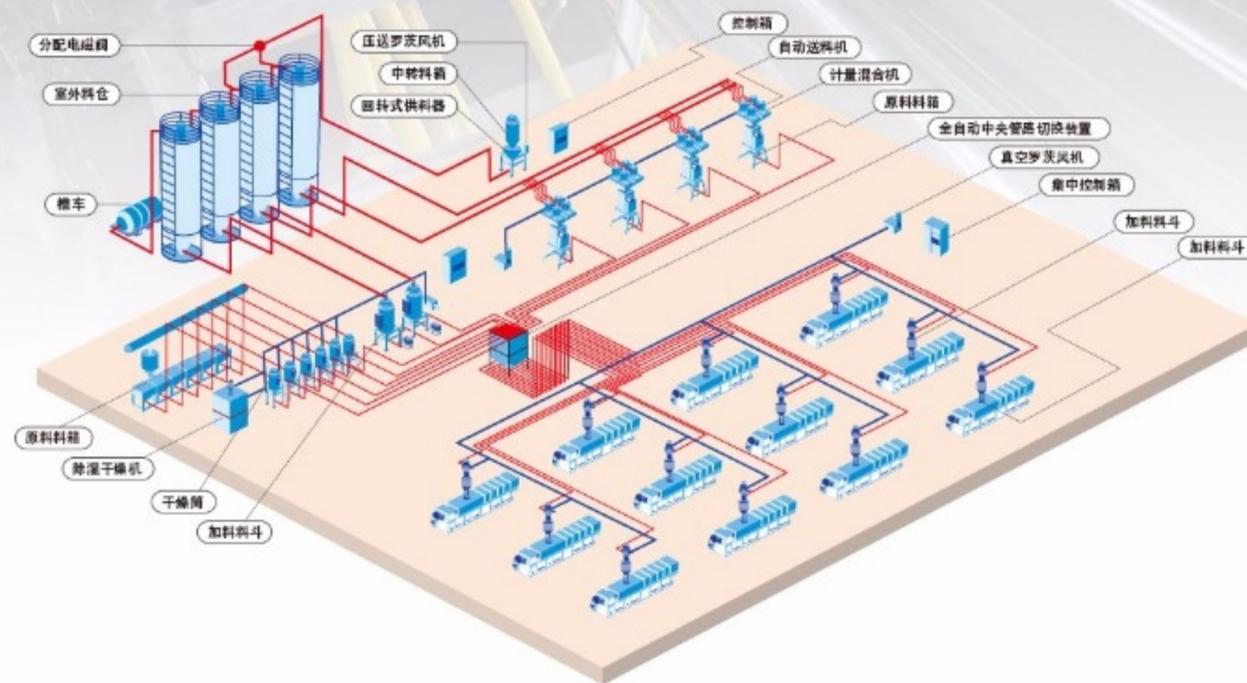

Based on the air conveying theory, with centralized control system, centralized material handling system conveys material automatically and continuously, ordered by the loading signal. This procedure is pre-programmed and stored.

特点 Features 集中供料系统 Centralized material handling system

- ☑ 可节约大量的人力，便于管理，便于控制
A dvantages to adopt the concentrated feeding system, Plenty of manpower can be saved to be convenient for management and control.
- ☑ 可以省场地，并使生产车间整齐划一，更为简洁
The site can be saved, and the manufacturing workshop is enabled to be neat and uniform as well as concise.
- ☑ 供料全自动化作业，符合现代化的生产模式
Full automation feeding operation conforms to modernized production mode.
- ☑ 降低噪音，大量减少粉末飞扬，为环境保护创造良好条件
Reduce the noise and substantially reduce the powder flying so as to create good conditions for environmental protection.

主要型式 Main types

- ☑ 正压输送装置：较适合长距离输送，特殊物料输送（采用罗茨风机）
Positive-pressure conveying device is applicable for long-distance conveying (Roots blower is adopted generally).
- ☑ 负压输送装置：较适合短距离输送，一般物料输送（采用气泵/罗茨风机）
Negative-pressure conveying device is applicable for short-distance conveying (Vacuum air pump is adopted generally).

为了使客户能更直观地了解集中供料系统，我们特地推出了展示系统（中附图）。该系统主要由真空风机组、PLC操空系统、真空集料筒及阀门、管道及配件等及大部分组成。在操控面板上，各个工作区域各部分的运转、供料状态的显示一目了然，各部分的异常可实现声、光自动报警。哪该系统的某个部分产生异常，也不会影响整个系统的正常工作。

In order to enable that the client can intuitively understands the concentrated feeding system, we specially push out the exhibition system (as shown in attached figure). This system is mainly composed by vacuum blower unit, PLC operation and control system , vacuum aggregate barrel, valve, pipeline and fittings as well as large portion. On the operating and controlling panel, the indication for each part of operation and feeding status in each service area is clear at a glance, and the sound and optic automatic alarm can be realized. If certain part in this system produces the abnormality, the normal service of whole system can also not be affected.
